DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Toporek et al (U.S. Patent No. 6,654,344). Toporek's patent meets all the limitations for claims 1-14 recited in the claimed invention.

4. As to claim 1, Toporek et al teach a computer-implemented method for automatically tuning a size of a TCP receive window comprising: determining a bandwidth of a network connection; and automatically tuning the size of the TCP receive window based on the determined bandwidth (figure 3G; column 5 lines 21-40; column 9 lines 41-48; column 17 lines 1-45; and column 18 lines 8-27 and 43-58).
5. As to claim 2, Toporek et al teach the steps of: obtaining at least one attribute of a network connection device; and determining the bandwidth of the network connection from the at least one obtained attribute (figure 3G; and column 17 lines 1-45).
6. As to claim 3, Toporek et al teach the steps of: determining the size of the TCP receive window based on the determined bandwidth; and setting the size of the TCP receive window to the determined size (column 18 lines 8-28).
7. As to claim 4, Toporek et al teach a step of: accessing the size of the TCP receive window from a look-up table (column 5 lines 21-40).
8. As to claim 5, Toporek et al teach a step of: determining a speed of the network connection device or a name of the network connection device (column 7 line 66 to column 8 line 35; and column 17 lines 1-25).

9. As to claim 6, Toporek et al teach the steps of: monitoring the network connection to determine if the network connection has changed: and tuning the size of the TCP receive window if the network connection has changed (figure 3G; column 17 lines 1-45; and column 18 lines 8-27 and 43-58).

10. As to claims 7-10, they are also rejected for the same reasons set forth to rejecting claims 1-4 and 6 above, since claims 7-10 are merely a computer readable medium having instructions for controlling the method of operations defined in the claims 1-4 and 6.

11. As to claims 11-14, they are also rejected for the same reasons set forth to rejecting claims 1-2 and 5-6 above, since claim 11-14 are merely an apparatus to performing the method of operations defined in the claims 1-2 and 5-6.
